

ADDENDUM NO. 1

Hart County Board of Commissioners

Addendum Dated: July 18, 2016

Bid: Road Paving

Bid Date: Thursday August 18, 2016

Note bidders must acknowledge receipt of this addendum on their bid form.

Listed below are changes and/or clarifications to the above mentioned bid:

- 1) Q: Will a MTV (Materials Transfer Vehicle/Shuttle Buggy) be required in placing the 12.5mm asphalt mix?
A: NO Not Required
- 2) Q: Will all of the roads receive leveling and at what application rate?
A: For quantity estimates an estimated 55#/sy was used however leveling will be as directed by the County. Some roads will not need leveling or as much leveling as others depending on the conditions of the existing road. The quantities given in the bid are estimates only and may be more or less depending on actual amounts placed on roads. Payment will be unit price based on leveling placed.
- 3) Q: The Typical Section makes a reference to Franklin Co and that they will Remove & Adjust All Utilities and do the necessary patching. Should we assume that this note does not apply?
A: The typical section was taken from a Franklin County bid document so this note does not apply. There should be no utilities to remove or relocate, this is a repaving project on exiting paved roads. The necessary patching was completed by Hart County and no additional patching is required as a part of this bid. Contractor will be required to do utility permit locates for sign posts placed.
- 4) Q: The typical sections included in the bid documents tell us the Surface Course is to be 9.5mm Type I applied at 125#/SY but page 13 says it will be 12.5mm applied at 165#/SY except for Country Ridge Rd (which does get 9.5mm Type I). Which is correct?
A: Ignore the typical section for application rates use the written specifications for surface course (12.5mm applied at 165#/sy except County Ridge road (9.5mm))
- 5) Q: Is the information posted on the website all of the bidding information available for this project?
A: Yes, with the exception of this addendum, maps included in this addendum, and future addendums (if issued).
- 6) Q: For the Bid Item Asphalt Surface Course 12.5mm you have bid quantity of 9.650 Tons
A: The decimal should have been a comma. The estimated quantity is 9,650 tons.
- 7) Q: There were no totals on the bid form.
A: That is correct the unit prices submitted will be used to calculate total costs by the County to determine the low bidder.
- 8) Q: No Maps were included with the bid as the bid documents stated.
A: That is correct. Maps are included with this addendum.

MAPS ARE INCLUDED AS A PART OF THIS ADDENDUM

END ADDENDUM NO. 1
